**BALA TO PRESENT AT NATIONAL BICSI CONFERENCE THIS FALL ON  
TECHNOLOGY CONSIDERATIONS FOR LEED AND GREEN DESIGN**

Walter P. Herring, RCDD/NTS/OSP, Director of Bala's Integrated Technologies Division, will be presenting at the BICSI Fall conference in Las Vegas, NV September 22, 2009. A frequent presenter at BICSI, Walt's topic this year is "Technology Considerations for LEED and Green Design." His previous presentations have been filled to capacity at BICSI events and this hot topic is sure to draw big attendance.

With a focus on GREEN initiatives in the ITS industry, the presentation will identify the possible LEED points available for technology systems, and good GREEN technology design practices. Attendees will learn the various levels of LEED recognition, the testing and point application process, as well as the LEED protocols and credentialing parameters.

If you are planning to attend the BICSI fall conference, don't miss this great presentation! For more information visit the BICSI conference website <https://www.bicsi.org/fall/>
