NAGGY NAMED DIRECTOR OF BUSINESS DEVELOPMENT FOR INTEGRATED TECHNOLOGY SERVICES GROUP

Bala is pleased to announce the promotion of Adrian E. Naggy, RCDD to Director of Business Development for our Integrated Technology Services (ITS) Group. Adrian has been a Senior Systems Specialist and Project Manager with Bala's ITS group for almost five (5) years. He has successfully executed multiple data center, corporate and university campus projects and built strong client relationships with many new clients during that time.

Adrian has over twelve (12) years of experience in the communication and technology industry. Prior to joining Bala he worked for world leaders in logistics and communication distribution products, as well as large communication contracting firms in the Philadelphia area. Adrian is extremely knowledgeable in communication systems and technology and has the strong industry relationships necessary to help Bala's ITS group exceed their sales goals and remain one of the top engineers in the industry.

[Bala Consulting Engineers](#) provides intensive engineering services for buildings, making them more energy efficient, secure and reliable. From green data centers and pioneer LEED projects, to proprietary commissioning and data migration processes our experience is unparalleled. In 2009, Bala formed an affiliate firm, [PHY Engineers, Inc.](#) PHY engineer's have extensive experience in high-rise, lifecare, and historic/adaptive re-use projects. Together we form one of the most innovative engineering and consulting groups in the MidAtlantic/ NE region with projects throughout the US.
