**INTEGRATED TECHNOLOGIES DIVISION AWARDED HISTORIC PRESERVATION AWARD FOR THE
ROSEMONT SCHOOL OF THE HOLY CHILD PROJECT**

In April of 2009, Lower Merion Township's Historical Commission honored the project team for the Rosemont School of the Holy Child with the Historic Preservation Award. The honor was in recognition of the new campus master plan created for the school. The Historical Commission applauded the efforts of the team and school for their contribution to the preservation of Lower Merion Township's rich cultural heritage.

Bala's Integrated Technologies division provided voice/data, wireless, and audio/visual systems design, as well as perimeter security systems. Teaming with Buell Kratzer Powell Architects the new campus master plan renovated 32,000 square feet of existing space, including 20,000 square feet in the Historic Mansion Building, and created 26,000 square feet of new facilities. Integrating new technology "tastefully" into a historic building is a challenging task, and one Bala was proud to accomplish.
