LABORATORY EXPERIENCE

From adapting an existing or historic building to function in a new world, with complex research labs and campus wide connectivity, to designing new facilities from the ground up, we have the necessary technical experience. Sensitive environments, such as research laboratories, require an experienced design approach with close attention to ventilation requirements, reliability, and back-up systems. We utilize sustainable design philosophies in our projects as good design practice or to achieve LEED certification.

PROJECT TYPES

Research & Development Labs	Biological Research Labs
Teaching Labs	Biosafety Cabinets
Clean Rooms (Class 10-100,000)	Pilot Plant Operations
Vivariums	Campus Infrastructures
