DATA CENTER EXPERIENCE

With a distinguished 30 year record of engineering excellence for Data Centers nationwide, Bala provides cost effective solutions that focus on energy efficiency, flexibility, reliability, scalability, and value for our clients. Data Centers are engineering intensive and engineering driven projects. Downtime is not an option in any facility.

Bala has been designing Data Centers since our first day in business, and Data Centers remain our focus. We have completed hundreds of projects for global business leaders, healthcare institutions and universities throughout the U.S.

Technology is an asset companies leverage for a competitive advantage, and is rapidly changing the way Data Centers are designed and utilized. Bala's expertise in adapting leading-edge technologies for our clients' benefit is a valuable resource. Our engineering solutions anticipate the specific demands of a project and are developed to efficiently deliver, monitor, and control power utilization, sustain critical operations, as well as minimize risk, cost and construction chaos.

PROJECT TYPES

Risk Assessment

Site Selection

MEP/FP Engineering

Data Center Layout

Integrated Technology Systems/Security

Building Information Modeling

Computational Fluid Dynamics

Integrated Systems Testing

Data Center Migration/Relocation
